

**REMARKS**

The foregoing amendments are made to insert the required SEQ ID NO identifiers associated with each listed sequence, as well as to correct a sequence discrepancy in SEQ ID NO: 5 (MM310) as listed on page 20, line 6 of the application as filed. In this regard, although the "C" at said location was erroneously inserted, one skilled in the art would understand that oligo MM310 was designed to be homologous to various other oligos, including MM311 and MM312. Support for said correction may be found in comparison to oligos MM311 and MM312, as well as in the correct recitation of SEQ ID NO: 5 (MM310) in Figure 2. No new matter has been added.

Applicants believe that the present application is now in condition for allowance. Favorable reconsideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application

Respectfully submitted,

Date July 8, 2009
